KIDS HAVE STROKES

Did you know? Babies can have strokes, even before they are born.

1 in 2800 babies is a stroke survivor

The cause of most strokes in babies is unknown

Watch for:
- Favoring one hand
- Holding other hand in a fist
- Weakness on one side
- Delays in rolling, sitting, crawling, and walking

Early Treatment is Key

Ask For Help:
- Pediatrician
- Pediatric Neurologist
- State Early Intervention Programs

Remember! No righty/lefty before 18 months of age
